2	Participant's Profile		5%
3	Test Scenario		10%
4	Detailed Findings and Recommendation		10%
Total			35%

Report Template: Usability Test

Date of Report: [September 13, 2024]
Date of Test: [September 3, September 4, September 6, September 9, September 12, 2024]
Location of Test: [Physical at Universiti Tunku Abdul Rahman, Kajang]
Prepared by: [AngYongXen, KyleYamatoChristian, TanJunYin, YapKaiZheng]

Methodology

In this usability test, our group have invited 6 participants which are 3 novice users and 3 expert users by they having the following characteristics as shown in Table 1.1 below, the users have chances to explore and use our bowling booking system [BowlZone] using the Axure RP file that provided by us.

Table 1.1 Users' Profile

Audience Type	Computer Usage	Number of application/ systems used	Age	Gender	[other related demographic details that determine the skill's level]
Novice 1	20 hours per week	3	19	male	-
Novice 2	19 hours per week	4	19	male	-
Novice 3	20 hours per week	4	19	male	-
Expert 1	30 hours per week	5	19	female	-
Expert 2	35 hours per week	5	19	male	-
Expert 3	40 hours per week	4	21	female	-

Participants met with the study facilitator for approximately 40 minutes in individual sessions, during which they were asked to complete a total of ten tasks testing. These tasks were designed to evaluate the usability and functionality of the mobile bowling reservation system.

In addition to completing these tasks, participants filled out a User Satisfaction Survey adapted from System Usability Scale (SUS) after they finish all tasks to assess their experience with the system. The survey took approximately 3 minutes to complete, and it provided quantitative measures of the system's ease of use. Participants also provided qualitative feedback on their satisfaction with the site and suggestions for improving the app's interface and functionality.

During the usability study of the bowling reservation system, several types of data were collected to assess both the system's performance and user experience. The data collected includes:

1. Task Completion Rates:
For each task, we measured whether participants were able to successfully complete the assigned task. We tracked both successful and unsuccessful task completions to calculate the overall task completion rate. A task was considered complete when the participant fully met the goal of the task, such as create a new account or complete a booking without assistance or errors.
2. Duration on Task:
We measured the amount of time participants took to complete each task. This data provided insights into how efficiently users could complete their actions and whether any steps in the process were particularly time-consuming. For example, the average time to complete a reservation task by each user was recorded to compare against expected completion times.
3. Task Errors:
We recorded the error that encountered by participants during the tasks. These included mistakes such as enter wrong personal information, selecting the wrong date for a reservation or fail to complete a payment. These data allow us to develop more effective solutions to prevent the user making errors and improve the user experience in our system.
4. Satisfaction Ratings:
After participants completed all task, participants were asked to complete a User Satisfaction Survey from System Usability Scale (SUS) to rate their satisfaction with the system using a 5-point scale. These satisfaction ratings were used to determine the overall user experience, with 1 representing "strongly disagree" and 5 representing "strongly agree".
5. Feedback:
Lastly, participants were encouraged provide feedback based on their experience. This included comments on what they found the best and least, confusing, or frustrating, as well as their thoughts on the overall design and functionality of the system. This qualitative data helped us better understand user opinion and identify potential areas for system improvement.

By collecting a combination of quantitative and qualitative data, we were able to obtain a comprehensive understanding of how users interacted with the system, the efficiency of task completion, and the overall user satisfaction with the system.

Test Scenario**Scenario 1 – Sign In Using Gmail/Email/Facebook/AppleID**

Number of participants	6
Percent successful	100%

Participant	Time to complete task (sec)	Number of error(s). Specify the errors- where, when, how.
N1	23	1 error – User entered email wrongly on the text field
N2	19	-
N3	13	-
E1	15	1 error – User entered wrong email on the text field
E2	9	-
E3	3	-

Findings	Recommendations
4 participants completed the task with ease (score of “2”) by sign in using their Gmail/Email/Facebook/AppleID 2 participants encountered errors while completing the task (score of “1”) with entered wrong email details. Expert users appreciated the simplicity and the speed using the Gmail, Facebook and AppleID account to sign-in their account which mention that it was quicker than manually fill in own details.th	Provide a clear and immediate error message when an incorrect email is entered by user. Add real-time email validation so that users are notified of potential mistakes (eg. Missing “@”) to prevent errors before submitting the form.

Scenario 2 – Create New Account

Number of participants	3
Percent successful	100%

Participant	Time to complete task (sec)	Number of error(s). Specify the errors- where, when, how.
N1	33	-
N2	29	-
N3	23	-

Findings	Recommendations
3 novice users completed the task successfully with ease (score of “2”) by fill in details to create a new account. All novice users successfully discovered and clicked on the present logo located on top page and able to access the detailed information about rewards available to members.	Since users experienced no issues, keep the current design of the button as it is well-placed and effective.

Scenario 3 – Forgot Password

Number of participants	6
Percent successful	100%

Participant	Time to complete task (sec)	Number of error(s). Specify the errors- where, when, how.
N1	55	-
N2	50	-
N3	33	-
E1	30	-
E2	26	1 error - User enter wrong reconfirmation password at the text field
E3	40	1 error – User enter incorrect password confirmation at the text field

Findings	Recommendations
4 participants completed the task with ease (score of “2”) by set a new password for their account to sign in. 2 participants had significant difficult completing the task (score of “1”) when enter wrong reconfirmation password.	Include more detailed instructions near the input field to help users avoid common mistakes. This can include the correct input formats like uppercase letter, lowercase letter or any symbols.

Scenario 4 – Access All Available Button

Number of participants	6
Percent successful	100%

Participant	Time to complete task (sec)	Number of error(s). Specify the errors- where, when, how.
N1	22	-
N2	21	-
N3	19	-
E1	18	-
E2	15	-
E3	17	-

Findings	Recommendations
All participants completed the task with ease (score of “2”) by access all available button on home page. All participants found the design button is easy to understand and creative.	Since users experienced no issues, keep the current design of the button as it is well-placed and effective.

Scenario 5 – Learn More

Number of participants	3
Percent successful	100%

Participant	Time to complete task (sec)	Number of error(s). Specify the errors- where, when, how.
N1	36	-
N2	25	-
N3	24	-

Findings	Recommendations
All novice users completed the task with ease (score of “2”) by clicking the ‘About us’ button to learn more about the bowling system.	Based on user feedback, the system needs to improve the visual appeal of the interface by incorporating more vibrant colors to the design.
1 participant expressed dissatisfaction with the design and suggesting for improvement.	Additionally, include attention-grabbing elements such as highlights or useful information to capture user’s interest during their interaction.

Scenario 6 – Reserve Booking

Number of participants	6
Percent successful	100%

Participant	Time to complete task (sec)	Number of error(s). Specify the errors- where, when, how.
N1	90	1 error – User entered wrong email on the text field
N2	79	-
N3	65	-
E1	50	-
E2	35	-
E3	42	-

Findings	Recommendations
5 participants completed the task with ease (score of “2”) by making a new bowling booking and view the booking details. 1 participant needed prompting or had significant difficult completing the task (score of “1”) by making error with enter the wrong email when proceed the payment process.	Provide additional instructions or tips during the payment page to prevent common errors. This can include placeholder text in the email field or a help icon with brief guidance. For example include placeholder text in the email field, such as ‘example@domain.com’ and offer a help icon that users can click for tips on entering their email correctly.

Scenario 7 – Contact Help

Number of participants	6
Percent successful	100%

Participant	Time to complete task (sec)	Number of error(s). Specify the errors- where, when, how.
N1	53	-
N2	34	-
N3	48	-
E1	33	-
E2	27	-
E3	24	-

Findings	Recommendations
All participants completed the task with ease (score of “2”) by successfully contact for help or solve the problem they faced in the system. 1 participant suggested that the FAQs section should offer more range of choices and solution where can saving time instead write email to the customer service.	Based on the feedback, increase the FAQs section by adding more categories and details solution to cover common issues and questions from the user. This will help users find solutions more easily without having to reach out to customer service/.

Scenario 8 – Check Notification

Number of participants	6
Percent successful	100%

Participant	Time to complete task (sec)	Number of error(s). Specify the errors- where, when, how.
N1	25	-
N2	22	-
N3	19	-
E1	15	-
E2	12	-
E3	11	-

Findings	Recommendations
All participants completed the task with ease (score of “2”) by view the notification and the confirmation booking details. All participants were satisfied with the notification system’s functionality, which allows them to easily enable notification by click the toggle button and delete the notifications. However, 1 participant found that after enabled the toggle button and return to the notification page again the notification was disabled. 2 participants found the notification bell have red dot when a booking confirmation is done, and they satisfied with it.	For the participant who found the notification toggle button disabled upon returning to the notification page. Our system will provide training and clear guidelines to the staff to ensure they correctly manage and verify notification settings. Conduct a review process to double-check that changes made by users are accurately save. For the positive feedback on the notification bell with a red dot. Continue to use the red dot to indicate for booking confirmations as it effectively alerts users and enhances their experience.

Scenario 9 – Redeem Rewards

Number of participants	6
Percent successful	100%

Participant	Time to complete task (sec)	Number of error(s). Specify the errors- where, when, how.
N1	45	2 error – User entered wrong code for redemption
N2	39	-
N3	21	-
E1	27	-
E2	9	-
E3	20	-

Findings	Recommendations
All participants completed the task with ease (score of “2”) by redeem rewards using member points and rewards redemption. 1 participant needed prompting or had significant difficult completing the task (score of “1”) where participant enter wrong code for redemption. All participants found the redeem points logically deducted after they redeemed a reward.	For the participant who entered a wrong code. Ensure that users are fully aware and understand the validation and feedback features. Provide clear instructions and examples on how to put the code correctly near the redemption code entry field. Continue to monitor the redemption process and gather feedback to ensure that the points deduction and reward redemption are functioning as expected. Make any necessary adjustments based on user experiences and feedback.

Scenario 10 – Update Personal Profile Information

Number of participants	6
Percent successful	100%

Participant	Time to complete task (sec)	Number of error(s). Specify the errors- where, when, how.
N1	30	-
N2	35	-
N3	46	-
E1	22	-
E2	32	1 error – User enter wrong Email at the text field
E3	36	-

Findings	Recommendations
5 participants completed the task with ease (score of “2”) by successfully update their personal profile information correctly. 1 participant needed prompting or had significant difficult completing the task (score of “1”) by entered wrong email for the update.	Provide additional instructions near the entry field to prevent common errors. This can include placeholder text in the email field or a help icon with brief guidance. For example, include placeholder text in the email field, such as ‘example@domain.com’ and offer a help icon that users can click for tips on entering their email correctly.

Usability Requirements

No	Usability Attribute	Measuring Instrument / Functions	Value to be Measured	Target Level	Observed Result
1	Speed of performance	"Reserve booking" task	Booking lane reserved	5 sec	< 2 sec
2	Speed of performance	"Sign in" task	Account recorded	5 sec	< 2 sec
3	Speed of Performance	"Confirm reserve booking" task	Time to receive confirmation notification after booking is completed	5 sec	< 2 sec
4	Effectiveness	"Contact support" task	User contacts support for help	Successfully contact for help	User successfully contact for help
5	Effectiveness	"Reserve booking" task	User reserves a booking	Successfully reserve booking	User successfully make a reserve booking
6	Effectiveness	"Redeem reward" task	User redeems their member points for reward	Successfully receive reward	User successfully redeem a reward
7	Effectiveness	"Update personal information" task	User updates their personal information	Successfully update personal information	User successfully update personal information
8	Efficiency	"Access all available button" task	Time to user access the button	1 min	<30sec
9	Efficiency	"Reserve booking" task	Time for user to complete reserve a booking	3 min	<2 min
10	Efficiency	"Make a payment" task	Time for user to complete the payment	2 min	<1 min
11	Rate of Errors by User	"Reserve booking" task	Number of errors	1 error	<= 1 error

12	Rate of Errors by User	"Reset password" task	Number of errors	1 error	≤ 1 error
13	Rate of Errors by User	"Enter the number of lanes"	Number of errors	1 error	0 error
14	Rate of Errors by User	"Enter the booking date"	Number of errors	1 error	0 error
15	Subjective Satisfaction	"View booking information" task	Frustration/satisfaction scales 1- Very dissatisfied 2- Dissatisfied 3- Neutral 4- Satisfied 5- Very satisfied	≥ 3	> 4
16	Subjective Satisfaction	"Reserve booking" task	Frustration/satisfaction scales 1- Very dissatisfied 2- Dissatisfied 3- Neutral 4- Satisfied 5- Very satisfied	≥ 3	> 4
17	Time to learn	"Learn more" task	The time for user locates the about page to gather information	1 min	≤ 1 min
18	Time to learn	"Reserve booking" task	Reduce in task of complete time on the second trial	2 min	< 2 min
19	Time to learn	"Make payment" task	Reduce in task of complete time of payment on second trial	3 min	< 2 min
20	Appeal	"Give feedback" task	Allow user to give feedback at the contact page about the system	Good feedback	Users give good feedback on the system
21	Retention over time	Entire system	How satisfied the user experience to use our system (with scale 1 to 5)	4 and above	> 4

User Impressions and satisfaction*Table 1. Novice 1 impressions*

Questions	Responses
Just from looking at this site/system, what kinds of information do you think you could get from this site? Please be specific.	I can get the information of bowling game interface system
What did you like best about the site?	Picture and poster of the bowling information
What did you like least about the site?	Update the personal information at My Account page
If you were to describe this site to a colleague in a sentence or two, what would you say?	The design is good, but it needs some improvement.
Do you have any other final comments or questions?	No

Table 2. Novice 2 impressions

Questions	Responses
Just from looking at this site/system, what kinds of information do you think you could get from this site? Please be specific.	I can get detail information about the bowling booking.
What did you like best about the site?	Making a bowling booking at the site.
What did you like least about the site?	The FAQs section should have more options to choose.
If you were to describe this site to a colleague in a sentence or two, what would you say?	This system can make a bowling booking easily.
Do you have any other final comments or questions?	I would like to see the system have more features.

Table 3. Novice 3 impressions

Questions	Responses
Just from looking at this site/system, what kinds of information do you think you could get from this site? Please be specific.	I able to book a bowling booking in this system.
What did you like best about the site?	The feedback I get after I have finished a task
What did you like least about the site?	I cannot cancel the booking I made
If you were to describe this site to a colleague in a sentence or two, what would you say?	The system very interactive and easy to book
Do you have any other final comments or questions?	Add more colors design for the system

Table 4. Expert 1 impressions

Questions	Responses
Just from looking at this site/system, what kinds of information do you think you could get from this site? Please be specific.	I able to understand that this system is about bowling reservation system, I can make a bowling booking easily on this system.
What did you like best about the site?	Convenient to use
What did you like least about the site?	The notifications of the system
If you were to describe this site to a colleague in a sentence or two, what would you say?	This system is well organised
Do you have any other final comments or questions?	No

Table 5. Expert 2 impressions

Questions	Responses
Just from looking at this site/system, what kinds of information do you think you could get from this site? Please be specific.	I can get information about the bowling reservation system and how to make a booking.
What did you like best about the site?	The system responds well and fast
What did you like least about the site?	No
If you were to describe this site to a colleague in a sentence or two, what would you say?	A good site to book for bowling
Do you have any other final comments or questions?	No

Table 6. Expert 6 impressions

Questions	Responses
Just from looking at this site/system, what kinds of information do you think you could get from this site? Please be specific.	Make a bowling booking from the system.
What did you like best about the site?	Easy to navigate
What did you like least about the site?	The design is simple
If you were to describe this site to a colleague in a sentence or two, what would you say?	It is easy to book
Do you have any other final comments or questions?	I hope that the design can be improve for the future.

Explanation of results obtained from the respondents in SUS survey

This table below summarizes the System Usability Scales (SUS) scores collected from 6 participants, consisting of three novice users and three expert users:

User Type	Parti	SUS Score
Novice	Novice 1	65
	Novice 2	67.5
	Novice 3	95
Expert	Expert 1	82.5
	Expert 2	92.5
	Expert 3	82.5
	Total	485

The average SUS score for all participants combined is 80.83. Since this score is well above 68 score, it indicates that the system has good overall usability. Both novice and expert users found that the system to be easy to use and understandable.

Executive Summary

The purpose of this study was to study the usability and effectiveness of the bowling reservation through user interviews and task-based scenarios. The main goal was to identify where the user experienced challenges while interacting with the system and their overall satisfaction using it.

Participants were asked to complete ten tasks, such as create a new account, sign in, forgot password, make a bowling reservation, managing notifications and more. Each task was conducted where users interacted with mobile app through the Axure RP file that provided by us. A total of 6 participants includes 3 novice and 3 expert users took part in the interview.

Overall, all participants were able to complete the assigned tasks successfully. However, minority of them have making some minor errors such as entered wrong email account for their personal details and entered wrong redemption codes for reward. Importantly, these error data help us to refine the system's design by identifying specific points. By analyzing why these errors occurred, we can design better user interfaces and experiences in future for the app and improve both task efficiency and user satisfaction.

Appendix**User Satisfaction survey** (adapted from System Usability Scale, Brooke, J. (1986))

Participant #1 (type: novice/ expert)

	Strongly Disagree 1	2	3	4	Strongly Agree 5
1. I think that I would like to use this website/system for booking/reservation related matter.				/	
2. I found the website/system unnecessarily complex.		/			
3. I thought the website/system was easy to use					/
4. I think that I would need the support of a technical person to be able to use this website/system.					/
5. I found this website/system was easily moved through without a lot of backtracking or data re-entry.				/	
6. I thought there was too much inconsistency in this website/system.			/		
7. I would imagine that most people would learn to use this website/system very quickly.				/	
8. I found the system/website very awkward to use.	/				
9. I felt very confident using the system/website.				/	
10. I needed to learn a lot of things before I could get going with this website/system.				/	

What did you like best about the site?

Picture and poster of the bowling information

What did you like least about the site?

Update the personal information at My Account page

If you were to describe this site to a colleague in a sentence or two, what would you say?

The design is good, but it needs some improvement.

Do you have any other final comments or questions?

No

Participant #2 (type: novice/ ~~expert~~)

	Strongly Disagree 1	2	3	4	Strongly Agree 5
1. I think that I would like to use this website/system for booking/ reservation related matter.					/
2. I found the website/system unnecessarily complex.			/		
3. I thought the website/system was easy to use				/	
4. I think that I would need the support of a technical person to be able to use this website/system.					/
5. I found this website/system was easily moved through without a lot of backtracking or data re-entry.			/		
6. I thought there was too much inconsistency in this website/system.		/			
7. I would imagine that most people would learn to use this website/system very quickly.					/
8. I found the system/website very awkward to use.	/				
9. I felt very confident using the system/website.				/	
10. I needed to learn a lot of things before I could get going with this website/system.			/		

What did you like best about the site?

Making a bowling booking at the site.

What did you like least about the site?

The FAQs section should have more options to choose.

If you were to describe this site to a colleague in a sentence or two, what would you say?

This system can make a bowling booking easily.

Do you have any other final comments or questions?

I would like to see the system have more features.

Participant #3 (type: novice/ expert)

	Strongly Disagree 1	2	3	4	Strongly Agree 5
1. I think that I would like to use this website/system for booking/ reservation related matter.					/
2. I found the website/system unnecessarily complex.		/			
3. I thought the website/system was easy to use					/
4. I think that I would need the support of a technical person to be able to use this website/system.	/				
5. I found this website/system was easily moved through without a lot of backtracking or data re-entry.					/
6. I thought there was too much inconsistency in this website/system.	/				
7. I would imagine that most people would learn to use this website/system very quickly.					/
8. I found the system/website very awkward to use.	/				
9. I felt very confident using the system/website.				/	
10. I needed to learn a lot of things before I could get going with this website/system.	/				

What did you like best about the site?

The feedback I get after I have finished a task

What did you like least about the site?

I cannot cancel the booking I made

If you were to describe this site to a colleague in a sentence or two, what would you say?

The system very interactive and easy to book

Do you have any other final comments or questions?

Add more colors design for the system

Participant #4 (type: ~~novice~~/ expert)

	Strongly Disagree 1	2	3	4	Strongly Agree 5
1. I think that I would like to use this website/system for booking/ reservation related matter.					/
2. I found the website/system unnecessarily complex.				/	
3. I thought the website/system was easy to use				/	
4. I think that I would need the support of a technical person to be able to use this website/system.		/			
5. I found this website/system was easily moved through without a lot of backtracking or data re-entry.				/	
6. I thought there was too much inconsistency in this website/system.		/			
7. I would imagine that most people would learn to use this website/system very quickly.					/
8. I found the system/website very awkward to use.	/				
9. I felt very confident using the system/website.					/
10. I needed to learn a lot of things before I could get going with this website/system.	/				

What did you like best about the site?

Convenient to use

What did you like least about the site?

The notifications of the system

If you were to describe this site to a colleague in a sentence or two, what would you say?

This system is well organised

Do you have any other final comments or questions?

No

Participant #5 (type: ~~novice~~/ expert)

	Strongly Disagree 1	2	3	4	Strongly Agree 5
1. I think that I would like to use this website/system for booking/ reservation related matter.					/
2. I found the website/system unnecessarily complex.	/				
3. I thought the website/system was easy to use					/
4. I think that I would need the support of a technical person to be able to use this website/system.	/				
5. I found this website/system was easily moved through without a lot of backtracking or data re-entry.					/
6. I thought there was too much inconsistency in this website/system.			/		
7. I would imagine that most people would learn to use this website/system very quickly.					/
8. I found the system/website very awkward to use.	/				
9. I felt very confident using the system/website.				/	
10. I needed to learn a lot of things before I could get going with this website/system.	/				

What did you like best about the site?

The system responds well and fast

What did you like least about the site?

No

If you were to describe this site to a colleague in a sentence or two, what would you say?

A good site to book for bowling

Do you have any other final comments or questions?

No

Participant #6 (type: ~~novice~~/ expert)

	Strongly Disagree 1	2	3	4	Strongly Agree 5
1. I think that I would like to use this website/system for booking/ reservation related matter.				/	
2. I found the website/system unnecessarily complex.		/			
3. I thought the website/system was easy to use					/
4. I think that I would need the support of a technical person to be able to use this website/system.	/				
5. I found this website/system was easily moved through without a lot of backtracking or data re-entry.				/	
6. I thought there was too much inconsistency in this website/system.		/
